Madras Medical College

Date: 8th August 2020

Time: 11.00 AM -1.00 PM

PREAMBLE

Webinar on QSAR- An Introduction was organised by Department of Pharmacognosy, The Oxford College of Pharmacy and IQAC on 8-8-2020 from 11.00-1.00 PM using Microsoft team's platform. Dr A Jerad Suresh, Principal, College of Pharmacy, Madras Medical College, Chennai was the guest speaker of the day. The programme was registered by 280 members including students, faculty from various colleges and approximately around 100 participants joined the live webinar including the faculty and students at The Oxford College of Pharmacy.

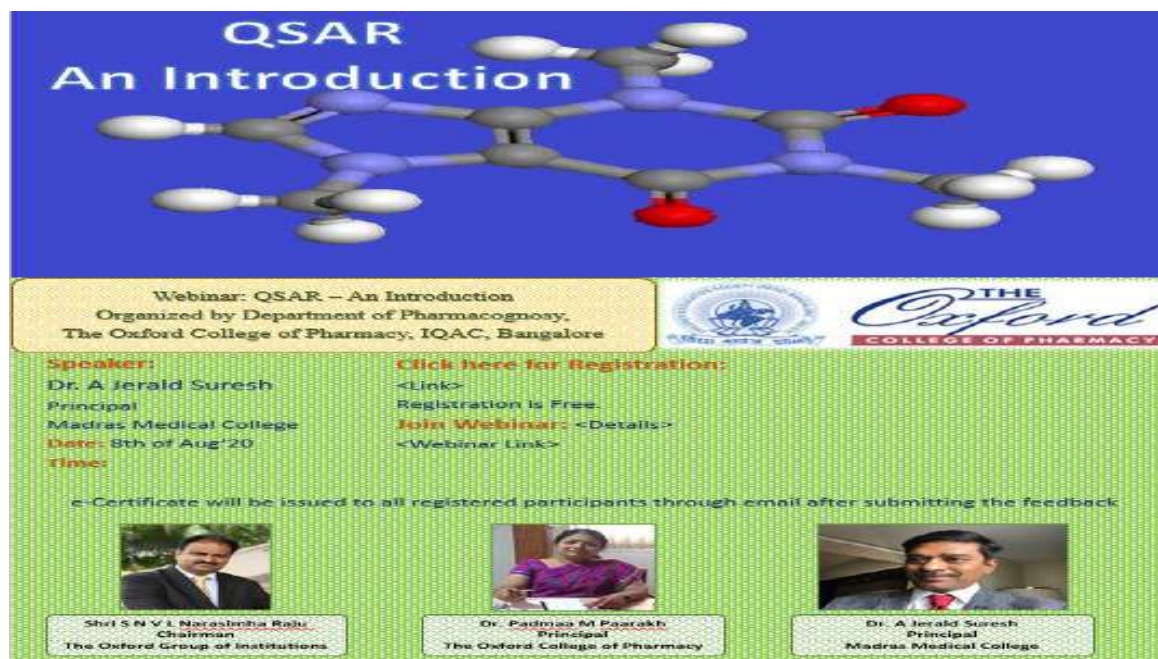

Dr Padmaa M Paarakh, Principal, The Oxford college of Pharmacy welcomed the gathering and the Guest speaker.

The content delivered in the webinar is as follows:

The topic for the webinar was QSAR - An Introduction. The correlation between physicochemical properties and biological activity was clearly explained by the speaker. All the variables used were explained, and the webinar was informative as QSARs are currently being applied in many disciplines pertaining to drug design and development. Understanding and practicing these principles in QSAR modelling will help medicinal chemists to prioritize their experimental effort and significantly increase the experimental hit rates.

The webinar was followed by a Q & A session where the speaker cleared the doubts of the participants.

At the end feedback link was taken from all the participants to improve the sessions that will be conducted in the future. The sample details collected from the participants is as follows:

**QSAR
An Introduction**

Webinar: QSAR – An Introduction

When the Values of Dependent Variable is only known:

- ✓ Imagine that values of Biological Activity arising from 7 different experiments are given.
- ✓ In such a situation you would predict the BA based on the mean value.
- If we plot,
 - ❖ BA on Y-axis.
 - ❖ No. of Experiments on X-axis and the mean value is 8.
 - ❖ There being no value for X i.e., $X=0$

Computational Chemistry

- The cost of research and development of a single new drug would be in the range of 2.6 billion dollars or 260 crores in rupee terms.
- This cost includes the cost of failures of the thousands and sometimes millions of compounds that might be synthesised and screened early in the R&D (Research and Development) process.
- The overall probability of clinical success is estimated to be less than 12%.

PREAMBLE

A Webinar on Prerequisites for Pre-clinical Evaluation of Drugs was Organised by Department of Pharmacology, The Oxford College of Pharmacy and IQAC on 09/11/2020 from 11.00-01:00 pm using Microsoft Teams platform. **Dr Shivakumar Hugar, Prof & HOD**, Department of Pharmacology, BLDEA'S SSM College of Pharmacy & Research Centre, Vijayapur-586103, Karnataka was the guest speaker of the day. The Programme was registered by 336 members including students, faculty from various colleges and The Oxford College of Pharmacy.

Dr.Padmaa M.Paarakh, Principal, The Oxford College of Pharmacy, Bangalore, welcomed the gathering and the Guest speaker.

The topic for the webinar was **Prerequisites for Pre-clinical Evaluation of Drugs**. Calculating the dose of drug based on Body Weight of animals, how to prepare appropriate strength of stock solution of plant extract /drug using suitable vehicle, preparation of stock solution of drugs available in ampoules i.e injection form. Convert human dose into corresponding experimental animal dose was explained by the speaker.

The webinar was followed by Q & A session where the speaker cleared the queries of the participants.

The webinar Programme was concluded with vote of thanks by Dr. Venkata Karthik Kumar Reddy, Assistant professor.

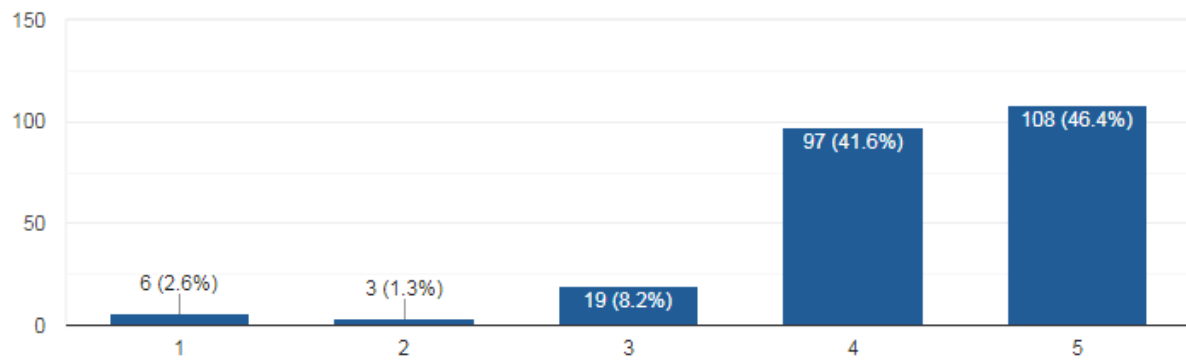

The webinar was informative and well appreciated by all the participants.

Online feedback was collected and E -Certificates were distributed to all the participants.

Time: 11.00 AM -12.30 PM

PREAMBLE

The Oxford College of Pharmacy, IQAC, Bengaluru in association with CLINI INDIA organized a webinar on the topic “Importance of Profession ready training in Clinical research and Pharmacovigilance” on 7th of May 2021 between 11:00 AM - 12:30 PM. The webinar was organized using webinar jam as the platform. There were 330 registrations for this webinar, which included the faculty, students of various courses of pharmacy from The Oxford College of Pharmacy as well as from other institutions.

The guest speaker of the day was Mr. Vishal Chaudhari, Head of Operations, CLINI INDIA. Ms. Sravani T, Assistant Professor, Department of Pharmacognosy, The Oxford College of Pharmacy introduced the guest speaker of the day and read out a brief biodata of Mr. Vishal which is as follows. Mr. Vishal Chaudhari completed his B. Pharm and did Master's in clinical research. He has been serving for 10 years in the Pharma industry and worked on multiple profiles. Last six years he has been a part of India's top institute in Clinical research, training, and placement, CLINI INDIA. As Head of the Operations, he is responsible to handle technical as well as training and placement support to CLINI INDIA campuses in Pune, Mumbai, Bangalore, and Hyderabad.

The content delivered in the program is as follows:

Mr. Vishal thanked all the participants for registering and started the webinar. He started to explain the basics of what clinical research is, clinical trial management (CTM), clinical data management (CDM), pharmacovigilance (PV), medical writing (MW) and clearly explained the differences between them. Later he continued to discuss the scope and posts into which the candidates can be hired according to the specialization. Mr. Vishal explained the scope in various IT healthcare, contract research organizations (CROs), pharmaceutical & biotech, multi specialty hospitals, medical communication firms, research centres & institutes for pharmacy graduates.

He also discussed the certificate courses offered by CLINI INDIA for the above courses. The following is the summary of the key points discussed by Mr. Vishal in the webinar.

- It will make you understand about the industry expectations from a fresher.
- How you must be prepared and be ready
- What are the secrets to achieve a higher package in a reputed organization?
- How online training will be and what it covers?
- What are the advantages of training?
- How actually placements happen?

The webinar was ended with a Q & A session where the participants asked few doubts regarding the placements, course details offered by CLINI INDIA, regarding how the courses will be beneficial to the final year students and will this covid has an impact on recruitment, which courses and options are beneficial to Pharm D students. The queries were patiently and justifiably answered by Mr. Vishal.

At the end feedback was taken from the participants by both CLINI INDIA and from The Oxford College of Pharmacy to improve the sessions that will be conducted in the mere future. The sample details collected from the participants is as follows:

Organizing
WEBINAR
in association with CLINI INDIA

"Importance of professional training & readiness for successful industrial placement"
Date- 7 May 2021. 11 AM

What will you learn?

- It will make you understand about the industry expectation from a fresher
- How you have to prepare and be ready- What are the secrets to achieve a higher package in a reputed organization- How online training will be and what it covers?
- What are the advantages of it?
- How actually placement happens?

Webinar on “Importance of profession ready Training in clinical research and Pharmacovigilance” Flyer

WHAT IS CLINICAL RESEARCH ?

Clinical research is a branch of health care science that determines the safety and effectiveness (efficacy) of medications, devices, diagnostic products and treatment regimens intended for human use

For the assessment of

- New drug
- New use of existing drug
- Use of medical devices
- New drug delivery system
- Vaccines
- New surgical procedures

CLINICAL TRIAL MANAGEMENT (CTM)

Clinical research is a branch of health care science that determines the safety and effectiveness (efficacy) of medications, devices, diagnostic products and treatment regimens intended for human use

YOU CAN BE HIRED AS...

- CLINICAL RESEARCH COORDINATOR (CRC)
- CLINICAL RESEARCH ASSOCIATE (CRA)
- SITE FEASIBILITY SPECIALIST
- PROJECT MANAGER

PHARMACOVIGILANCE (PV)

Pharmacovigilance (PV or PhV), also known as drug safety, is the pharmacological science relating to the collection, detection, assessment, monitoring & prevention of adverse effect with pharmaceutical products.

YOU CAN BE HIRED AS...

- PHARMACOVIGILANCE SCIENTIST
- DRUG SAFETY ASSOCIATE
- PROJECT MANAGER
- MEDICAL DIRECTOR

MEDICAL WRITING (MW)

Medical Writers work closely with biostatistician, pharmacovigilance, project management and clinical data management teams to deliver accurate, timely and cost effective documents to the highest ethical and scientific standards

YOU WILL BE HIRED AS...

- MEDICAL WRITER / SCIENTIFIC WRITER
- CONTENT WRITER / EDITORIAL ASSOCIATE
- SENIOR EDITOR
- MEDICAL DIRECTOR

CLINICAL DATA MANAGEMENT (CDM)

Clinical Data Management generates high-quality, reliable and statistically sound data from clinical trials. Clinical data management assures collection, integration and availability of data at appropriate quality and cost

YOU CAN BE HIRED AS...

- DATA ANALYST OR DATA SPECIALIST
- DATA PROCESS ASSOCIATE
- TEAM LEADER
- PROJECT MANAGER

EMPLOYERS..

Date: 17th May 2021

Time: 11.00 AM -12.30 PM

PREAMBLE

A IPR webinar on the topic “Prior Art Search” was organised by the Department of Pharmacognosy, IQAC, The Oxford College of Pharmacy, Bengaluru.

The webinar was organised using MS teams as a platform. The participants got registered prior with the link along with poster which was circulated to students. There were 100 registrations for this webinar, which included the faculty, students of various courses of pharmacy from The Oxford College of Pharmacy as well as from other institutions.

The guest speaker of the day was **Dr.Sarasija Padmanabhan, DL-Tutor, WorldIntellectual Property Organisation**. The webinar started with an inaugural address by **Dr.Padmaa M Paarakh, Principal**, The Oxford College of Pharmacy. Dr.Padmaa extended her warm welcome to the participants and resource person of the webinar. She gave a brief introduction of the college, courses and facilities provided to the students. Later **Dr. Mal Murugan, Director**, The Oxford group of Institutions expressed his heartfelt thanks to be a part of the webinar and thanked principal and guest speaker of the day. Ms. Sravani T, Assistant Professor, Department of Pharmacognosy, The Oxford College of Pharmacy introduced the resource person of the day and read out a brief biodata of **Dr.Sarasija Padmanabhan** which was as follows,

Dr.Sarasija has a proficient patent facilitating expert with 20+ years’ experience. She is multi-faceted, with broad technology intelligence (including patent and non-patent literature) in Biochemistry, Molecular Biology, Pharmaceutical Sciences, Organic Chemistry, Inorganic Chemistry, Medical Devices, Physical Chemistry, Bioengineering, Polymer and Material Sciences, and newer domains which interface multiple disciplines like Nanotechnology and Biotechnology. She has a high calibre delivery of excellent client experience via outstanding and precise information retrieval and application. Record of delivering multi-domain technology landscapes within strict time and budget constraints with no compromise on quality. Complete patent competitive landscape support involving business, technology, science and IP law. She completed the WIPO distance learning course DL-101 on Intellectual Property and passed the course with an A grade and she is a registered Patent agent in India.

The content delivered in the webinar is as follows:

Dr.Sarasija Padmanabhan, the guest speaker of the day, thanked all the participants and started the session. She explained what prior art search is explained and explained what can be patented and what cannot be by taking a few examples and made the session interactive. She also explained in detail the steps involved in prior art search and explained in detail how to search different patents using Google patents. The session was more interactive, and students participated with good interest as the topic was quite relevant and relatable to their studies.

Later, **Dr.Sarasija Padmanabhan** responded to the questions and queries raised by the participants. This was followed by a vote of thanks from Dr.Padmaa M Paarakh, Principal, The Oxford College of

Pharmacy. She thanked Dr.Sarasija Padmanabhan, for justifying the topic taken and increasing the knowledge of the students and participants on the topic of Prior Art Search.

Finally, the session was ended with a vote of thanks by Ms. Sravani T who thanked Dr.Sarasija Padmanabhan, on behalf of The Oxford Group of Institutions for gracing important work and for sharing her findings and opinions on the topic “Prior Art Search”.

Ms. Sravani also thanked Dr.Padmaa M Paarakh, Principal, The Oxford College of Pharmacy, for perfect logistic support and guidance, she has extended to all of us in successfully organizing the webinar

PREAMBLE

The Oxford College of Pharmacy, NSS Committee, IQAC, Bangalore conducted the session on “MEDITATION AND PRANAYAMA” for the students and teaching faculties. There were totally 30 participants who included faculties and students.

Ms. Meghana B V, Network engineer at Wipro delivered lecture on “Meditation and Pranayama”.

The content delivered in the webinar is as follows:

She started the event with Pranayama Prayer starting as (Pranasyedam vase sarvan tridive yat pratishtitam, Mateva putran raksasva, Srisca prajansca vidhehi nah iti) and explained its meaning.

Later she explained the basics of meditation and Pranayama and clearly explained the different asana like (Kapalabhati Pranayama, Bhastrika Pranayama, Bhramari Pranayama, Nadi Suddhi Pranayama, Trataka (Eye Excises) and OM chanting). Later she explained the advantages and demonstrated how to perform and she informed the participants regarding sitting position, warnings for individual asana. She made the participants to follow her instruction and asked how they felt after performing each asana.

The event was ended with an ending Prayer stated as (Yogena cittasya padena vacam, Malam sarirasya ca Vaidyakena, Yo’pakarotam pravaram munina, Patanjalin Prajaliranatosmi) and explained its meaning. The event was ended with Q & A session where the participants asked few doubts regarding the Do’s and Don’ts.

The queries were patiently answered by Ms. Meghana.

The session was completed with a Questionnaire from participants to clarify their doubts. Finally, the webinar was concluded with a vote of thanks.

At the end feedback links were given to the participants from The Oxford college of Pharmacy.

PREAMBLE

The Department of Pharmaceutics conducted the webinar on “Good laboratory practices for Pharmaceuticals and Biopharmaceuticals” for the students, scholars and teaching faculties.

Dr. Basavaraj K Najwade M pharm Ph.D. working as assistant vice president in QA, QC and R&D has 20years’ experience in pharmaceutical industry and pharmaceutical education. He developed 36 new products (10 nutra and 26 pharma) for domestic and international.

There were totally 350 above participants, out of which 250 were students and 100 were from various other institutions which included faculties and research scholars.

The course content delivered in the webinar is as follows:

The impact of GLP in the Current environment was discussed in this session.

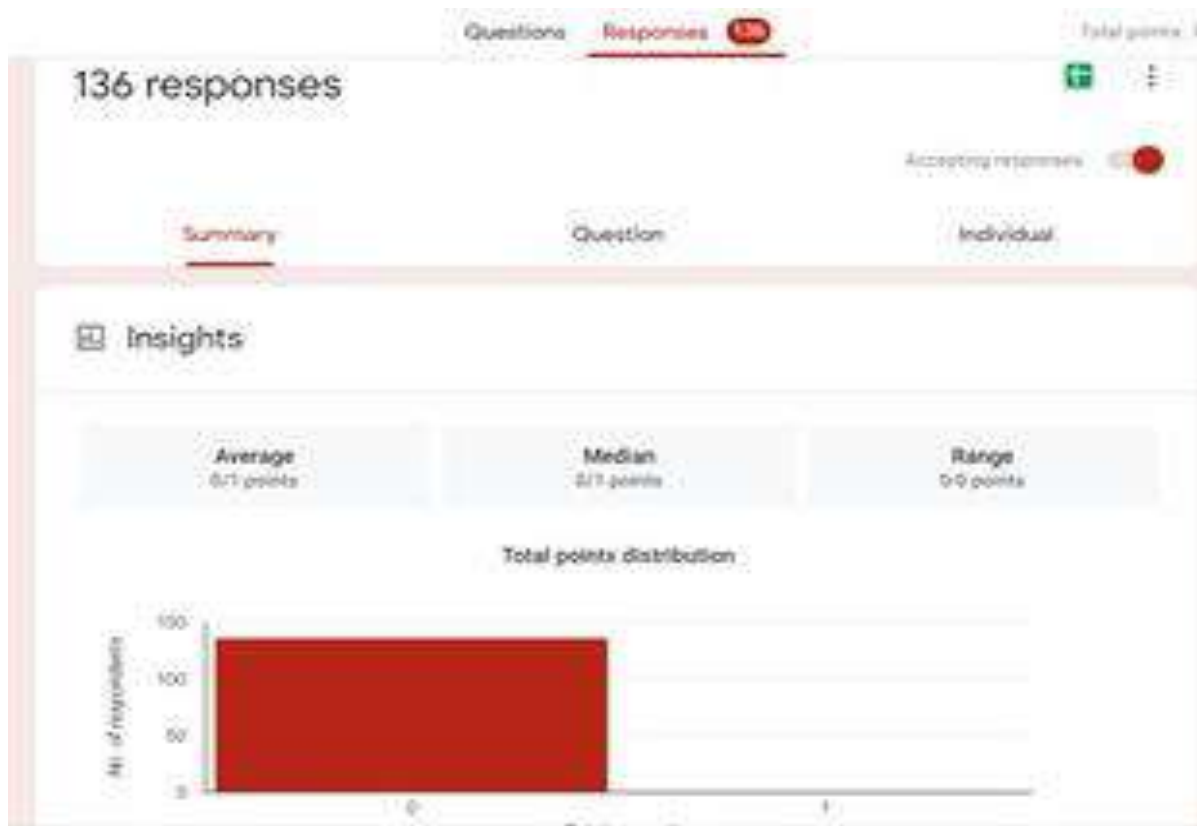

To lay down a procedure for Good laboratory practices to be followed to obtain reliable and reproducible results, meeting Regulatory standards with effective usage of time, Man power and resources.

GLP/GMP concern all people who work in areas where it applies, whether that are managers, supervisors or staff, it also effects those “Indirectly” involved, in activities such as maintenance, cleaning, record keeping and in support areas such as the personnel department etc.

The principles of good laboratory practice (GLP) is to support the development of quality. GLP aim is to decrease the occurrence of mistakes or mix-up through large and specific labeling requirements. So every analyst those who are working in quality control or in other testing laboratory should follow GLP.

Definition

Good Laboratory Practice embodies a set of principles that provides a framework within which laboratory studies (Activities) are planned, performed, monitored, recorded, reported and archived.

GLP help assure regulatory authorities that the data submitted are a true reflection of the results obtained during the study and can therefore be relied upon when making risk/safety assessment.

PREAMBLE

The Oxford College of Pharmacy, NSS Committee, IQAC, Bangalore conducted the session on “3D: DESTINATION, DECISION, DIRECTION” for the students. There were totally 300 participants who included faculties and students.

Mr.GM Sofi Kamal delivered lecture on “3D: DESTINATION, DECISION, DIRECTION”

The content delivered in the webinar is as follows:

He started the webinar and interacted with students and helped the student regarding goal setting and gave his own life experience as an examples to explain the hear ship and word to be done to achieve our goal.

The event was ended with a bonus tips. The event was ended with Q & A session where the participants asked few doubts regarding the Do's and Don'ts.

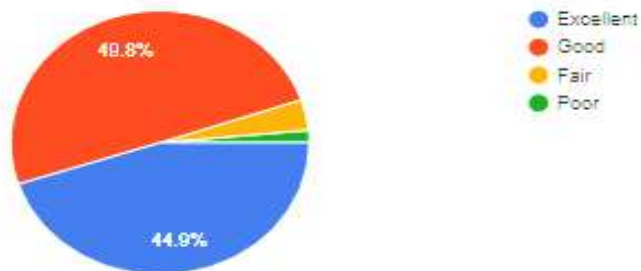

The queries were patiently answered by Mr. GM Sofi Kamal

The session was completed with a Questionnaire from participants to clarify their doubts. Finally, the webinar was concluded with a vote of thanks.

At the end feedback links were given to the participants from The Oxford college of Pharmacy.

PREAMBLE

The Department IQAC The Oxford college of Pharmacy and The Department of Pharmacy Practice conducted the webinar on “Clinical Research -A Scientific way for new drug development” for the students, scholars and teaching faculties.

The field of Clinical research is fast growing potential sector in past few decades. Many of the Pharma professionals are finding career in Clinical research with high salary. This webinar is planned to cover all growing opportunities in the field of Clinical research. The Speaker Dr Ramesh Adepu, has developed first indigenous Clinical Decision Support System “CliniRex” a one stop solution for evidence based drug information and ACPE standard clinical pharmacy documentation and evaluation software to build the professional competencies among Pharm D students. Clini Rex is marketed by Tychee Innovations Pvt Ltd, a startup company approved by Govt of India under his leadership as Chief Operating Officer (COO).

The course content delivered in the webinar is as follows:

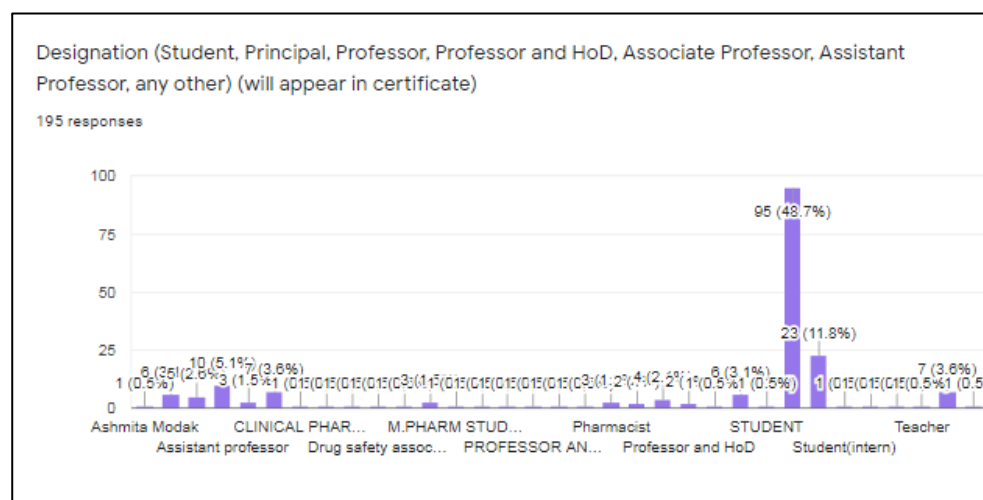

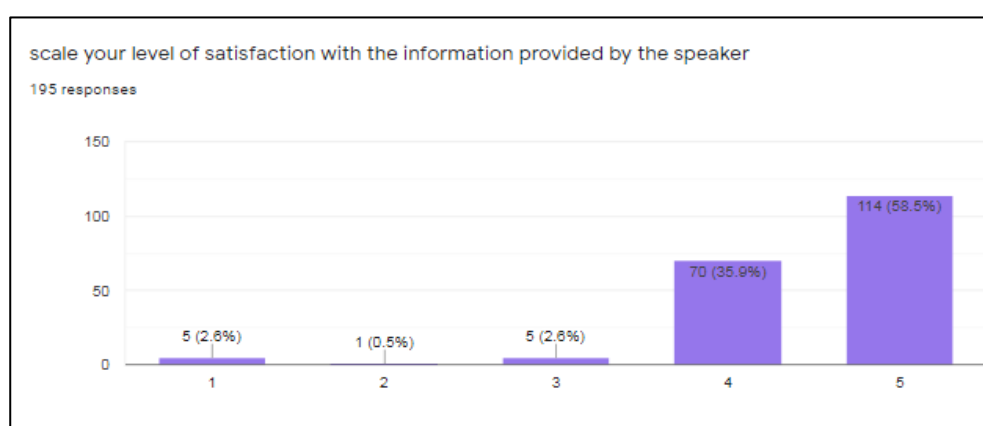

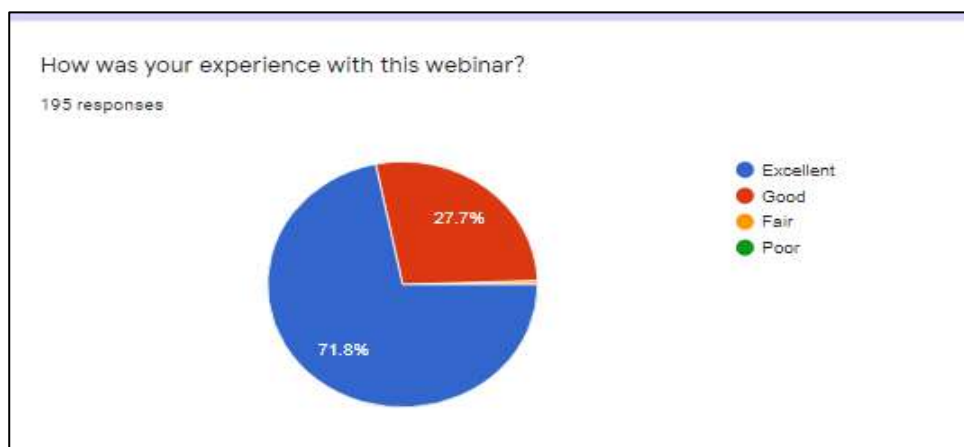

In this seminar he covered topics related to the need of new drug development, Disease Targeting, Drug discovery stages, Drug development, Clinical Trial Phases, Approval, Good Documentation Practice, The Importance of data, NDA, Current Clinical research Market, India a preferred destination for CR, and Advantages in R&D sourcing.

He pointed out that Current Clinical research Market investment Market size value in 2020 was USD 2,064.30 million, the Revenue forecast in 2025 is USD 3,125.16 million. Growth Rate expected may be CAGR of 8.7% from 2017 to 2025.

He also mentioned that India a preferred destination for CR, Location Attractiveness, Infrastructure Communications, Other Basic, Country risks/FD incentives, Political Environment, Attractive Incentives, Time Zone attractiveness. Other advantages might be People Strength, Qualifications/Capabilities, Cost Differential, English Language, Type of Skills, Work Ethics.

He also listed many advantages in R&D sourcing in India.

FEEDBACK REPORT

There were 195 participants attended this webinar online and submitted their feedback. This webinar was conducted in the motive of sharing the knowledge and practical experience of Mr. Ramesh Adepu, who has long years of experience in Clinical Research. The overall organization and deliverance of the webinar was helpful and satisfied the participants.

Why New Drug Development?

- Unmet Medical needs
- These diseases do not have definitively useful therapies, and are actually or potentially life-threatening.
- Drug discovery is a process of identifying chemical entities that can be used as therapeutic agents.

The objective of the webinar was achieved. The overall session discussion benefitted the faculties and students. This webinar would help the participants to develop effective personal branding that will help to differentiate you from the competition and allow you to build trust with prospective clients and employers. You never get a second chance to make a first impression—make it one that will set you apart, build trust and reflect who you are.

Vishakhapatnam, A.P.

Date: 8thJune 2021, Tuesday

Time: 10 AM to11AM

PREAMBLE

The Department of Pharmaceutics, The Oxford College of Pharmacy under IQAC conducted the webinar on “In Vivo & In Vitro Considerations in The Dosage Form Development” for the students, scholars and teaching faculties. There were totally around 287 participants, from various other institutions which included faculties, research scholars, undergraduates and post graduates.

Ramana Murthy, K.V., Ph.D. Senior Professor (Stage 6) &Principal (Retired) A.U. College of Pharm. Sciences, Andhra University, delivered the lecture.

The content delivered in the webinar is as follows:

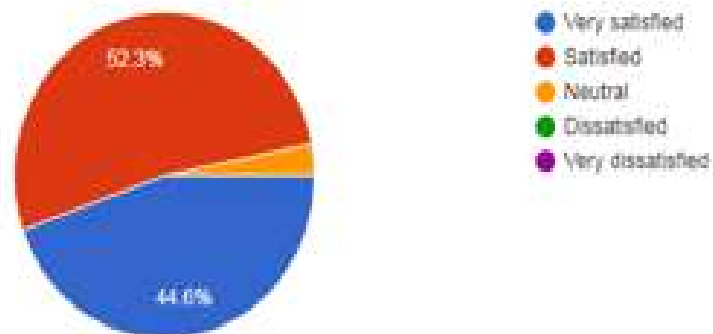

The speaker of the session Dr Ramana Murthy presented the keynote address on “In Vivo & In Vitro Considerations in The Dosage Form Development”. He briefed the participants with the basic concept of biopharmaceutics, and explained mechanism of drug absorption along with the different factors affecting the absorption. He also explained the BCS classification, its importance for the selection of drug for the formulation and discussed regarding the biopharmaceutical hurdles in drug development. He emphasized on the in-vitro in-vivo correlation (IVIVC) which has been defined by the U.S. Food and Drug Administration as "a predictive mathematical model describing the relationship between an in-vitro property of a dosage form and an in-vivo response", which has tremendously eased the development of formulation. Generally, the in-vitro property is the rate or extent of drug dissolution or release while the in-vivo response is the plasma drug concentration or amount of drug absorbed. In vitro and in vivo studies provide valuable information for all stages of biomedical research. The different mathematical models to the dissolution profile help in understanding the order and mechanism of drug release.

The feedback about the session was collected from all the participants to improve the sessions that will be conducted in the mere future. The sample details collected from the participants is as follows:

THE FEEDBACK OF THE SESSION

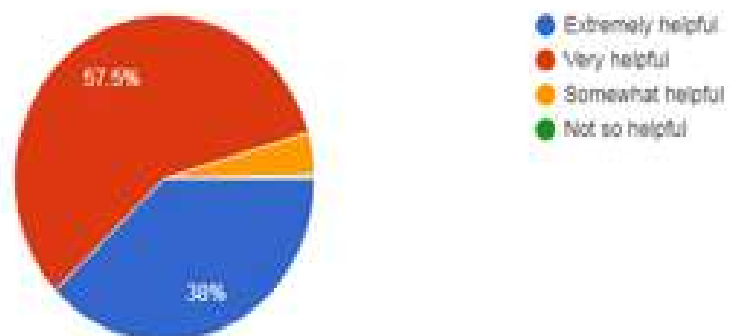

State the level of satisfaction with the information provided by the speaker.

DATE: 21ST OF JUNE 2021, MONDAY

TIME: 11:30 AM - 12:30 AM

PREAMBLE

The Oxford College of Pharmacy, NSS Committee, IQAC, Bangalore conducted the session on “INTERNATIONAL YOGA DAY OF 2021” for the students and teaching faculties. As online session became a part of the process, the event was organized using Microsoft teams as the platform. There were 263 registrations for this event, which included the faculty, students from The Oxford College of Pharmacy. MR. PRASANTHAN, Sahaja yoga trainer, Associate architect, Bangalore delivered lecture on “Sahaja yoga and meditation technique”.

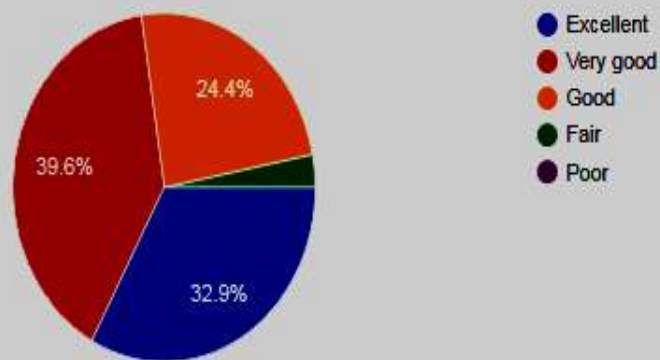

The content delivered in the webinar is as follows:

MR. PRASANTHAN thanked Mataji Nirmala Devi for rediscovering sahaja yoga as holistic health care for people and this session helped us to focus on awakening the dormant primordial energy (Kundalini energy), whereby a flow of subtle cool cosmic vibrations in the body was achieved which nourished and rejuvenated each and every cell of the body.

The event was ended with Q & A session where the participants asked few doubts regarding the Do's and Don'ts.

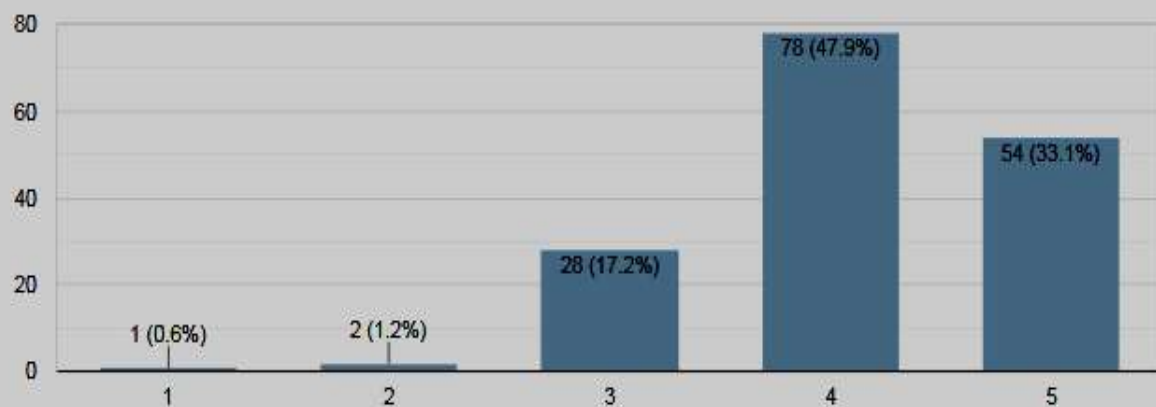

How was the experience with today yoga session?

Date: 7th July 2021, Wednesday

Time: 2 PM to 4PM

PREAMBLE

The Department of Pharmaceutics conducted the webinar on “Self Understanding is the step to self branding” for the students, scholars and teaching faculties. There were totally around 130 participants who included faculties, research scholars, undergraduates and post graduates. Later, principal **Dr. Padmaa M Paarakh** shared few words about the guest speaker. **Prof. Nancy Johnson**, Head, Corporate Relations, The Oxford Educational institutions delivered the lecture.

The content delivered in the webinar is as follows:

The Speaker of the Session Prof. Nancy Johnson presented the keynote address on “Self Understanding is the step to self branding”. She discussed Self-Awareness is essential in personal branding as research suggests that when we see ourselves clearly, we become more confident, communicate better and build stronger relationships.

Personal branding is what shapes the perception of an individual in the eyes of the public. Personal branding is all about building your reputation, creating an image of yourself for the outside world and marketing yourself as an individual. Essentially, your personal brand is the story that’s told about you when you’re not in the room.

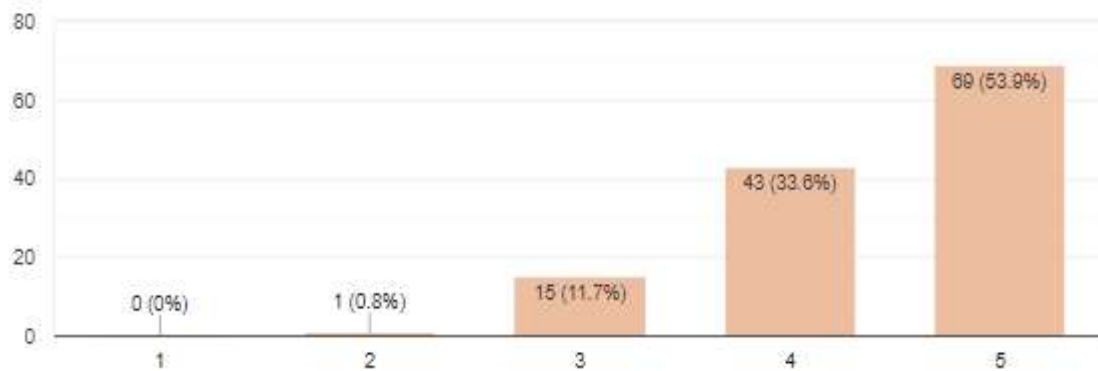

Personal branding is the process by which an individual actively tries to manage others' impressions of their skills, abilities and experiences. Self-awareness and understanding one's strengths and weaknesses in order to effectively present the self is essential to building a personal brand.

Also the feedback about the session was collected from all the participants to improve the sessions that will be conducted in the mere future. The sample details collected from the participants is as follows:

Time: 11 AMto12 PM

PREAMBLE

The Department of Pharmaceutics conducted the webinar on “Design of Experiment in Pharmaceutical Research” for the students, scholars and teaching faculties. There were totally around 120 participants, from various other institutions which included faculties, research scholars, undergraduates and post graduates.

Dr. Harish Dureja, Dept of Pharmaceutical Sciences Director, Centre For IPR Studies, Maharshi Dayananda University, Rohtak, Haryana delivered the lecture.

The content delivered in the webinar is as follows:

The impact and use of recent technology in the field of pharmacy was discussed in this session.

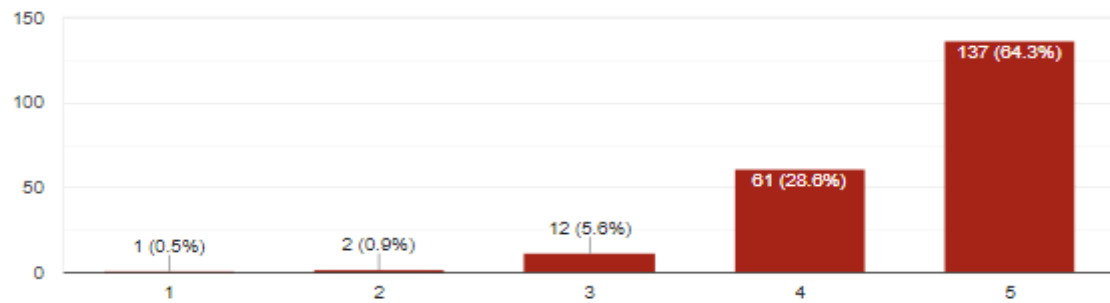

The Speaker of the Session Dr. Harish Dureja presented the topic on “Design of Experiment in Pharmaceutical Research”. He discussed the basic concepts used in the Design of Experiments (DoE) since currently it is extensively used for the implementation of QbD in both research and industrial settings. In QbD, product and process understanding is the key enabler of assuring quality in the final product. Knowledge is achieved by establishing models correlating the inputs with the outputs of the process. The mathematical relationships of the Critical Process Parameters (CPPs) and Material Attributes (CMAs) with the Critical Quality Attributes (CQAs) define the design space. Consequently, process understanding is well assured and rationally leads to a final product meeting the Quality Target Product Profile (QTPP).

DoE tools help to identify and explain how critical analytical parameters (CAPs) (independent variables) affects the analytical method performance characteristics (AMPC) (dependent variables) and, therefore, the analytical target profile (ATP).

Also the feedback about the session was collected from all the participants to improve the sessions that will be conducted in the mere future. The sample details collected from the participants as follows:

Step 1

Quality Target Product Profile (QTPP)
is a quantitative surrogate for aspects of clinical safety and efficacy that can be used to design and optimize a formulation and manufacturing process, which includes quantitative targets for:

- Indication and route of administration
- Dosage form and strength
- Container closure system
- Attributes affecting pharmacokinetic characteristics (i.e. dissolution and aerodynamic performance)
- Drug product quality criteria (i.e. sterility, purity, stability and drug release)

PREAMBLE

The Oxford College of Pharmacy, NSS Committee, IQAC, Bangalore conducted the session on “HOW TO PREPARE FOR, PERTAIN TO, AND PERSIST IN A JOB?” for the students. There were totally 243 participants who included faculties and students.

Ms.Arpatha Chinnu Sabu, TMC Ops Team Lead, Navya Network.Inc, Bangalore (navya.care) delivered lecture on

The content delivered in the webinar is as follows:

She started the webinar with:

How to Prepare for a Job?- Before Interview,
How to Prepare for a Job?- During interview,
How to Prepare for a Job?- After interview,
How to Pertain to a Job?
How to Persist in a Job?

The event was ended with a bonus tips. The event was ended with Q & A session where the participants asked few doubts regarding the Do's and Don'ts.

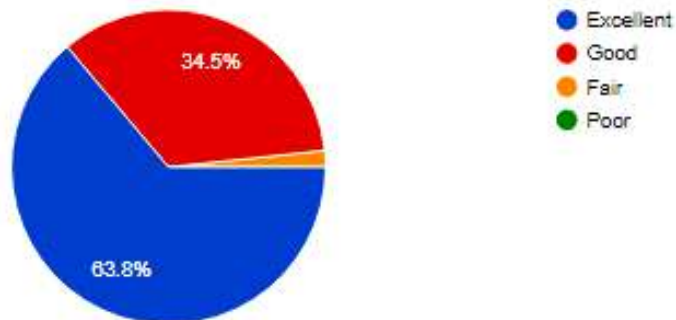

The queries were patiently answered by Ms.Arpatha Chinnu Sabu.

The session was completed with a Questionnaire from participants to clarify their doubts. Finally, the webinar was concluded with a vote of thanks.

At the end feedback links were given to the participants from The Oxford college of Pharmacy.

This programme is arranged to share the knowledge on the topic “HOW TO PREPARE FOR, PERTAIN TO, AND PERSIST IN A JOB?” by ARPITHA CHINNU SABU. The overall organization and deliverance of the webinar was helpful and satisfied the participants.

How to Prepare for a Job?- During interview

- ✓ Show your confidence. If not this, another one will come your way.
- ✓ Physical attire does matter.
- ✓ Do not beat around the bush. This is the sign of lack of knowledge.
- ✓ Be honest if you don't know. This will help you assess how much more you have to prepare.
- ✓ Develop passion and showcase it.
- ✓ Be selfless. Keep your priorities aside during the first round.
- ✓ Show interest in the organisation. Once you get selected, the organisation itself will consider your priorities.
- ✓ Do not look into google/phone while on virtual interview

How to Pertain to a Job?

How to Persist in a Job?

- ★ Persistence = Perseverance

Ibn Sina Pharmacy, Muscut, Oman

PREAMBLE

The Department IQAC, The Oxford college of Pharmacy and The Department of Pharmacy Practice conducted the webinar on “Understanding the Causes and management of Chronic Venous insufficiency (Varicose Veins)” for the students, scholars and teaching faculties.

The management of any disease is 100% successful when completely understanding the cause. The Varicose vein is one such problem faced by many people. But many of them don't know it is caused due to their life style. This webinar focused the topic to understand the cause of varicose vein and finding solution at the early stage of the disease. The webinar speaker Mr. Prabakar is well experience in the field of community pharmacy services in the Middle East country Oman, since from the past 20 years.

He is expert in patient counseling for medication administration, drug interaction. As marketing of Pharmaceutical product specialist, he is expert with various pharmaceutical therapeutic management such as Oncology, Anaesthetic, Hemostatic agents, Immunomodulators, Venotonic agents, PPI, Antibiotics, and Haematology segment. He was awarded the Best Pharmacy practice award from MOH Oman in the year 2008. He got committed to CME and regularly updating knowledge through Pharmaceutical related courses, who currently working with Ibn Sina Pharmacy in Oman as a product specialist for OM / VIFOR Pharma products.

The course content delivered in the webinar is as follows:

In this seminar the speaker covered topics related to the need of understanding the cause of varicose vein and finding solution and treatment at the early stage of the disease.

He pointed out various risk factors of the disease the effect of sedentarism, prolonged standing or sitting at work increase the risk of disease varicose vein. He explained in the initial about the normal venous anatomy and functions. Normally the venous blood is pumped out in the leg by calf muscle action. The venous valve determines the direction of blood flow to the heart and prevents the flow of blood backward. He said the chronic venous insufficiency is abnormal blood flow in the lower extremities.

Some of the predisposing factors are the lack of exercise, genetic predisposition, aging, female gender, standing occupation, smoking, obesity, pregnancy, ect.

He also mentioned that the untreated venous insufficiency results in the gradual loss of cosmesis, persistent pain and discomfort, hemorrhage, superficial thrombosis, progressive skin changes.

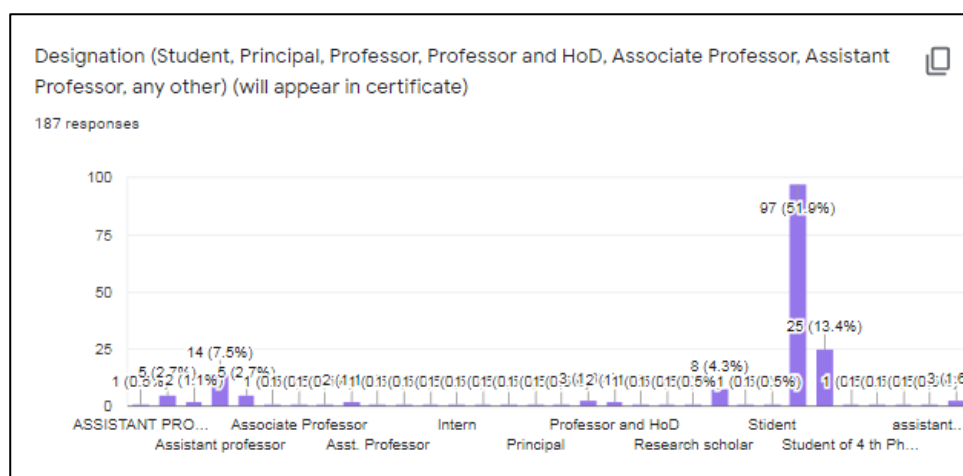

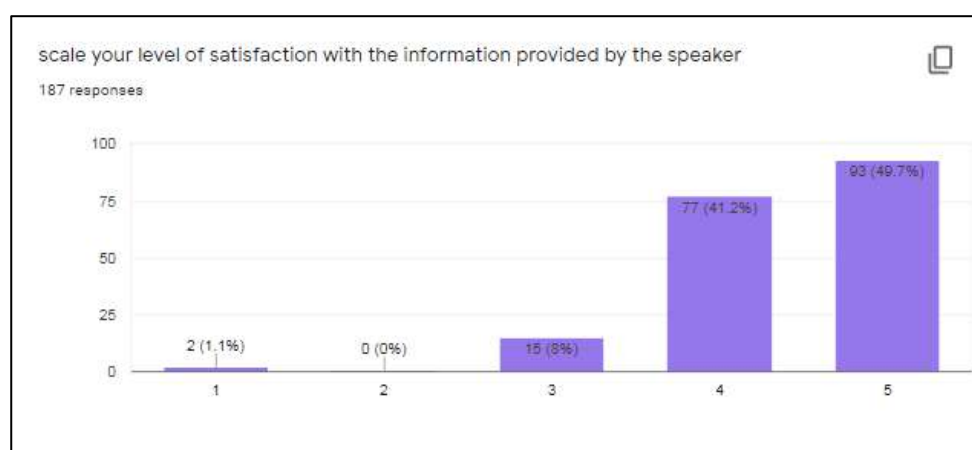

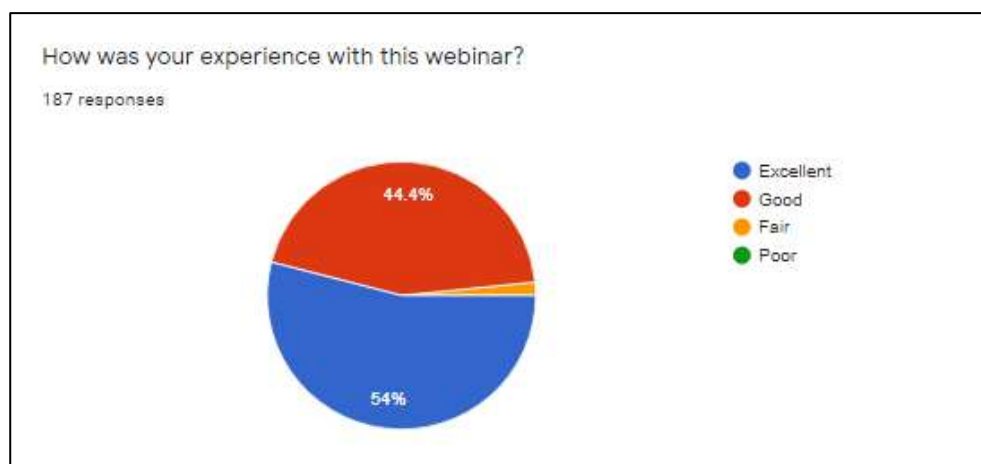

The disease progression can be divided into stages, C0 to C6. He also told the stage C1 contain reticular vein, C2 varicose vein, C3 Edema of left leg, C4 pigmentation or eczema, C5 Eczema and healed leg ulcer, C6 skin changes with active venous ulcer. For the treatment Angiologist must be contacted. Some of the treatment options are thermoablation, chemical ablation, surgery-ligation. He mentioned many drugs used in the therapy, like, MPFF, diosmin, Rutin, Rutoside, alpha- Coumarin, some saponins Escin, Ruscus extract, Plant extracts like Gingko anthocyanins. Some synthetic products like Naftazone, Benzaron.

He also mentioned about corona phlebotatica is the latest addition in the venous insufficiency disease stage. This is caused due to the inactive indoor lifestyle caused due to corona lockdown conditions and long term online working culture.

He also introduced few questionnaires developed to understand the stage of progressive chronic venous insufficiency disease.

Finally MrP Prabakar interacted and answered all the queries and doubts asked by participants.

FEEDBACK REPORT

There were 187 participants attended this webinar online and submitted their feedback. This webinar was conducted in the motive of sharing the community pharmacist knowledge and practical experience of Mr. P Prabakar, who has long years of pharmacist experience in Oman. The overall organization and deliverance of the webinar was helpful and satisfied the participants.

Webinar on Understanding the Causes and Management of Chronic Venous Insufficiency (varicose veins)

02 Clinical presentation of CveD

| Grade ¹ | Disease progression ¹ | | | | | | |
|---|---|--|---|---|---|--|-------|
| Clinical signs ¹ | C0 | C1 | C2 | C3 | C4 | C5 | C6 |
| No visible or palpable signs of venous disease | Telangiectasias or reticular veins | Varicose veins; distinguished from reticular veins by a diameter of 3 mm or more | Edema | Changes in skin and subcutaneous tissue secondary to CveD; divided into two sub-classes to better define the differing severity of venous disease | Skin changes as defined in C4, with healed venous ulcers | Skin changes as defined in C4, with active venous ulcers | |
| Normal vein | Reticular veins | Varicose vein | Edema of left leg | | | Ecema and healed leg ulcer | Ulcer |
|  |  |  C2: recurrent varicose vein |  |  C4a: pigmentation or eczema C4b: lipodermatosclerosis or atrophie blanche C4c: corona phlebectatica |  |  C6: Recurrent active venous ulcer | |

¹ = Symptoms including aches, pains, tightness, skin irritation, heaviness, muscle cramps, as well as other complaints attributable to venous dysfunction.

Webinar on Understanding the Causes and Management of Chronic Venous Insufficiency (varicose veins)

IT IS IMPORTANT TO TREAT PATIENTS AT THE EARLIEST STAGES UNTIL THE REMISSION OF SYMPTOMS AND EDEMA 5,7

CONSENSUS ITALIAN 2019

| N | RECOMMENDATION |
|---|--|
| 1 | The treatment of patient with CVD should always include indications on the correct lifestyle to adopt |
| 2 | All patients in CEAP clinical classes C0-C3 with symptoms may benefit from treatment with veno-active drugs (VADs) |
| 3 | Compression therapy should always be recommended in C0-C1 in presence of symptoms, while in C2-C3 regardless their presence |
| 4 | The veno-active therapy should be continued until the remission of symptoms and/or edema. Two months is considered as minimum period of veno-active therapy intake. |
| 5 | Veno-active drugs should be considered complementary and non-alternative to compression therapy, in particular in presence of persistent clinical manifestation of the disease |
| 6 | In the prescription of conservative treatment the effects of the veno-active drug on symptoms and on the pathophysiological mechanisms of the disease should be considered |
| 7 | Patient's needs should be taken into consideration in order to obtain greater compliance with the treatment |

Note: All the seven statements reached a consensus of 100%.
